

Unit 05: Homework Assignment

Deployed App: [Link](#)

Github Repository: [Link](#)

Screenshots:

The screenshot shows the MongoDB Atlas web interface. The breadcrumb navigation at the top indicates the path: `bookstore.yjbxcbt.mongodb.net > amana-bookstore > books`. A button labeled `>_ Open MongoDB shell` is in the top right corner. Below the breadcrumb, there are tabs for `Documents` (46), `Aggregations`, `Schema`, `Indexes` (1), and `Validation`. The `Documents` tab is active. A query editor at the top contains the text `Type a query: { field: 'value' } or Generate query`, with buttons for `Explain`, `Reset`, `Find`, `</>`, and `Options`. Below the query editor is a toolbar with buttons for `ADD DATA`, `EXPORT DATA`, `UPDATE`, and `DELETE`. To the right of these buttons is a pagination control showing `25` items per page and `1 - 25 of 46` total items. The main area displays two JSON documents. The first document is for a book titled "Fundamentals of Classical Mechanics" by Dr. Ahmad AL-Kindi, with a price of 89.99 and a rating of 4.8. The second document is for a book titled "Modern Web Development with React and Next.js" by Dr. Sarah Chen, with a price of 67.99 and a rating of 4.8. Both documents include fields for `_id`, `id`, `title`, `author`, `description`, `price`, `image`, `isbn`, `genre`, `tags`, `datePublished`, `pages`, `language`, `publisher`, `rating`, `reviewCount`, `inStock`, and `featured`.
